

Project 07: Human Scale_Soft Edge Studies

As part of your Schematic Design studies, produce a large-scale section showing how you propose to develop an edge on your site. Consider:

- How does the edge invite desired uses?
- How does the edge promote indoor-outdoor relationships?
- How does the edge create a sense of human scale?
- How does the edge create and convey neighborhood identity?

Draw the edge section large, showing human use and interaction – e.g. at 1" = 1' – 0". The section can be informal and on trace but ensure that it clearly shows your primary proposals for creating soft edges/human scale.

We will pin them up on **Wednesday Oct. 24, at the beginning of class.**
